

30 April 2024

## Quarterly Activities Report – March 2024

- **Creditors voted to accept Deed of Company Arrangement proposal** 19 January 2024
- **Voluntary Administration ceased and Company returned to control of directors** 1 February 2024
- **Audited financial report year ended 30 June 2023 completed and lodged** 23 February 2024
- **Notice of Annual General Meeting completed and issued** 28 February 2024
- **Reviewed financial report half year to 31 December 2023 completed and lodged** 15 March 2024
- **Prospectus issued for Offer of Shares and Options** 15 March 2024
- **Annual General Meeting held** 28 March 2024

*Post-quarter end:*

- **Grant of additional West Arunta exploration license** 3 April 2024
- **Closure of Offer under Prospectus** 15 April 2024
- **Application to ASX for reinstatement to trading of APC shares** 29 April 2024

Australian Potash Limited (**ASX: APC** or the **Company**) is pleased to provide its Quarterly Activities Report for the period ending 31 March 2024.

**Managing Director and CEO, Matt Shackleton, commented:** “The process of Voluntary Administration proved to be very effective, with positive outcomes for our shareholders and suppliers. We successfully proposed a Deed of Company Arrangement that was approved by creditors, establishing a clean, reconstructed balance sheet.

Combined with two highly prospective exploration projects and a reconstituted Board carrying a breadth of experience across a range of mineral commodities, we are pleased to again report on the successful Prospectus offer. The Company raised capital sufficient to recommence drilling at the walk-up drill targets at Lake Wells, and to re-open discussions with traditional owners on whose ground the Nexus rare earth project in the West Arunta sits.

We have made application to ASX for reinstatement of the Company’s securities to the trading platform, and hope to be in a position to make an announcement about this final step in the reconstruction process presently.”

## Deed of Company Arrangement

On 2 February 2024 it was announced that the Company had exited Voluntary Administration and returned to the control of the Directors. Creditors voted at a second meeting on 19 January 2024 to accept a Deed of Company Arrangement (**DOCA**) proposed by Matt Shackleton, with all previous trade and other creditors of the Company transferring to a Creditors' Trust, removing these liabilities from the Company's balance sheet.

Under the terms of the DOCA, the Company funded the Creditors' Trust with \$900,000, following the issue of \$1 million in converting loans.

On 15 March 2024 the Company lodged a Prospectus with ASIC in relation to an offer of Shares and Options on the following terms:

- a Priority Placement offer to all existing shareholders on the register at the record date of 14 March 2024;
- a General Placement offer following the close of the Priority Placement offer;
- an issue price of \$0.001 per share; and
- one (1) free attaching option for each two (2) shares subscribed for under both the Priority Placement and General Placement offers, exercisable at \$0.0015 per option for a period of 3 years. The Company will seek to have these options listed on ASX.

Canaccord Genuity (Australia) Limited acted as Lead Manager and Cumulus Wealth Management Limited was been appointed Co-Lead Manager for the capital raising. The capital raising was underwritten to \$2.75million. The Offer closed on 12 April 2024 with \$2.98 million raised.

Following the return of the Company to the Board's control, Management moved immediately to finalise the 2023 Financial Report, the December 2023 half-year review financial report, and to conduct the 2023 Annual General Meeting. At the date of this Report, all matters referred to above are complete and the Company has provided ASX with information and responses to all matters raised by ASX ahead of reinstating the Company's shares to the trading platform.

### Lake Wells Gold Project (LWGP)

In 2018, APC and St Barbara Limited (**SBM**) entered into a joint venture for the exploration, development and mining of non-potash minerals at the Lake Wells Gold Project. Over the duration of that joint venture, SBM spent approximately \$3.5million exploring (primarily for gold) the tenements, which sit contiguous to, and south of, the Lake Wells Sulphate of Potash (**LSOP**) development envelope. The LWGP extends approximately 80km to the south of Lake Wells, where it adjoins tenure currently being explored by successful gold producer Gold Road Resources Limited (ASX: GOR).

APC has 100% ownership of the tenure comprising the LWGP.

A geological review of all previous exploration results has been conducted and recommendations developed for an aircore drill program to the most prospective 'walk-up' drill targets (see Figure 1). It is anticipated that drilling will commence at the LWGP during the June 2024 quarter once the recapitalisation of the Company has been completed.

Figure 1: The LWGP sits on the edge of the Archean craton

### West target

This target is the projected northern strike extension of the Yamarna Shear Zone (YSZ) and is prospective for Golden Highway style mineralisation (ala Gold Road Resources Ltd (ASX: GOR)

Target consists of a +6km strike length of untested YSZ which has only a single drill line over it.

### East target

The target is an 8 km strike extension of the Ibanez host rock package.

Magnetic data shows that this package continues north from Ibanez up through APC's tenements for 8km and includes a prominent S shaped bend featuring a nearly 90-degree strike change which is considered a desirable structural target for gold mineralisation.

Existing drilling, mostly AC over this area only consists of 1,600-2,000m spaced drill lines which are too widely spaced to effectively test for a small footprint (600-800m strike length), high grade deposits.

Figure 2: Two 'walk-up drill targets' emerged after the interpretation of the combined APC and St Barbara drill assay database

Figure 3: Bend in strike and the Ibanez trend on GOR's Golden Highway

## Nexus REE & Lithium Project (Nexus)

The Nexus Project is located in the West Arunta of Western Australia’s Kimberley region. The project comprises an exploration licence application (E80/5917) and the Company has entered into an agreement to purchase a contiguous exploration licence (E80/5778).

Attention has been focused on the West Arunta region recently through the discovery of a high-grade carbonatite hosted niobium deposit by explorer WA1 Resources Limited (ASX: WA1) and ongoing lithium exploration by Independence Group (ASX: IGO), amongst others.

APC’s exploration strategy at Nexus is to expand the work conducted by previous tenement holders, by pursuing the increasing tenor of lithium and rare earth mineralisation in the lacustrine clays overlying the Bitter Springs formation to the south of the Webb Granite. Initial work will focus on securing heritage and access agreements to enable on the ground exploration activities to proceed.

Figure 4: Encouraging historical drill assay results for REE mineralisation have been recorded at the Nexus Project

Figure 5: The West Arunta province is attracting exploraiton interest following the identification of mineralisation around and across the large Webb Granite

### Laverton Downs Project (LDP)

The Laverton Downs Project is located approximately 5km north of Laverton. Regional geology highlights the potential for gold and nickel sulphide mineralisation. Project evaluation undertaken by APC incorporating regional datasets, detailed magnetic data and high precision geochemical assay results derived from historical bottom of hole drill samples confirmed that a Kambalda-style nickel deposit host rock type is present within the LDP.

In early 2023, APC signed a binding Tenement Sale Agreement with Maverick Minerals Pty Ltd (Maverick) for the sale and purchase of the six tenements comprising the LDP. The due diligence period was completed and settlement was pending only Maverick’s IPO and listing on the ASX. In April 2024, the Company was contacted by Maverick advising that it was no longer pursuing an IPO and thereby terminating the transaction.

## Laverton Training Centre (LTC)

The Laverton Training Centre is an initiative of APC which provides access to nationally accredited vocational training for long-term unemployed Aboriginal people living in this remote part of Western Australia. The LTC training ethos is modelled on the highly successful Martu-ku Yiwarra Training Centre in Wiluna, a unique four-year pilot remote Aboriginal vocational training program which was funded by local employers, overseen by Martu Elders, and had training delivered by Central Regional TAFE Kalgoorlie as the registered training organisation.

During the period, students from the remote Aboriginal communities of Warakurna, Wanarn and Warburton (close to the Northern Territory border) completed training in workplace health and safety which qualifies them for White Cards, enabling remote employment. Students from Leonora received instruction during December 2023 in chemical and weed spraying to assist them progress towards employment as Rangers with the Tijwarl land management program.

Photos 1-3: LTC training delivery in the December 2023 quarter including chemical and weed spraying for Leonora students and White Card for Warakurna students

To the date of writing, 164 individual students have completed a total of 480 federally accredited vocational training units at the LTC, with over 80% of these students experiencing a direct employment outcome. Of the students, 130 identify as Aboriginal or Torres Strait Islanders and 47 as women. LTC students have attended training from Leonora, Mount Margaret, Laverton, Wiluna, Kalgoorlie and the Ngaanyatjarra, and Tjuntjunjarra communities.

## Corporate

During the quarter, payments to related parties and their associates totalled \$30,000, comprising directors' salaries, fees and superannuation. (ASX Listing Rule 5.3.5)

In addition, a summary of the expenditure incurred during the quarter on the activities described in this report is as follows: exploration and evaluation \$24,000 (expensed); staff costs \$117,000; and administration and corporate costs \$87,000. Proceeds of \$74,000 were received in relation to property, plant and equipment. (ASX Listing Rule 5.3.1)

## Mining Tenement Holdings

In line with obligations under ASX Listing Rule 5.3.3, APC provides the following information relating to its mining tenement holdings as at 31 December 2023.

Area	Tenement	Interest at 30 September 2023	Action	Interest at 31 December 2023
Lake Wells	E38/1903	100%	-	100%
	E38/2113	100%	-	100%
	E38/2505	100%	-	100%
